

3098

4

6. Explain the life cycle and pathogenicity of the parasite causing Ascariasis. Add a note on the diagnosis, treatment and prevention of this disease. (12)
7. Write short notes on any **THREE** of the following : (4×3=12)
- (a) Parasitism as evolutionary response
 - (b) Amoebiasis
 - (c) Pathogenicity of *Taenia solium*
 - (d) Parasitic adaptations in *Pratylenchus spp.*
 - (e) Hood Mocking Bird

(700)

[This question paper contains 4 printed pages.]

Your Roll No.....

Sr. No. of Question Paper : 3098

H

Unique Paper Code : 32237906

Name of the Paper : Parasitology

Name of the Course : **B.Sc. (Hons.) Zoology**

Semester : (DSE) VI, LOCF

Duration : 3 Hours

Maximum Marks : 75

Instructions for Candidates

1. Write your Roll No. on the top immediately on receipt of this question paper.
2. Attempt **ANY FIVE** questions in all.
3. Question No. 1 is compulsory.

1. (i) Name the parasite where following structures are seen : (6)

- (a) Copulatory bursa
- (b) Capitulum
- (c) Proglottid
- (d) Organ of Berlese

P.T.O.

(e) Signet ring

(f) Pediculosis

(ii) Differentiate between the following terms : (8)

(a) Parasite and Parasitoid

(b) Definitive and intermediate host

(c) Lymphangitis and Lymphadenitis

(d) Anthroponosis and Zoonosis

(iii) Explain the following terms : (8)

(a) Premunition

(b) Occult Filariasis

(c) Facultative parasite

(d) Prophylaxis

(iv) Fill up the following blanks : (5)

(a) _____ is the infective stage of *Trichinella spiralis*.

(b) Smallest tape worm infecting the human is _____.

(c) _____ pigment is found in RBC infected with Malarial disease.

(d) _____ is the vector responsible for the transmission of Trench fever.

(e) Sensillum is found in _____.

2. Describe the life cycle, pathogenicity and control measures of the parasite causing sleeping sickness. (12)

3. Identify the wingless insect which has laterally compressed body with long hindlegs adapted for jumping and is mostly found attached to hairs of rodent host. Why it is a cause of concern? Discuss the biology of this insect and enumerate the control measures. (1+3+8=12)

4. What are epizootic and enzootic cycles? Describe the life cycle, clinical diagnosis and control measures of *Fasciolopsis buski*. (2+10=12)

5. Describe the life cycle of a blood fluke with suitable diagrams. Elaborate the pathogenic conditions of the host and write its diagnostics methods and control measures. (12)
